**CATALOGUE 2023-2024 ENGLISH**  
Tools for jewelers, stone setters,  
watchmakers and lapidarists

AGILO creates tools for jewelry and watchmaking, thanks to close collaborations with great professionals from Switzerland and abroad. In our development process, we take seriously every detail of the tool itself and the needs of the professionals.

We develop and select our tools with a circle of 20 highly-skilled experts, bench jewelers, stone setters, watchmakers and lapidarists, from young artists to experienced teachers.

Each of the innovations that you will discover in the catalogue needed two years of development and testing. They are identified with the logo «AGILO CIRCLE».

Next to our own tools, AGILO distributes renowned brands: GLARDON-VALLORBE and SUPER-Q.

Please get in touch to discover our tools, for any question or specific need.

Jason Marchiafava is a famous artist, engraver and stone setter from the USA, also teacher for New Approach School for Jewelers and for GRS. He uses here the AGILO MICROPAVE-HP drill to start setting on a piece of platinum. Jason says that these HSS drills are precise and long lasting, perfect for working with a micromotor.

We thank Jason for kindly giving us this image showing him working with our drill.

# AGILO SOFT TO GRIND AND SMOOTHEN PRECIOUS METALS

## AGILO SOFT - Carbide burs

AGILO-SOFT Carbide burs perform grinding and refining as well as smoothing of precious metals. After using this bur, simply sand with emery paper and start polishing. Shank  $\varnothing 2.34\text{mm}-3/32"$ . Maximum speed: 20,000rpm.

Perfect for rounded shapes like the inside of rings, on castings, bezel settings and on wax. The flame bur is the most versatile and easiest shape to use, even on the inside of rings. It is less technical and risky to use than the cylinder bur.

Use the smaller bur #1432.040 on tighter areas, for example for bezel settings. Sold by the piece.

Art. Nr.	Description	CHF Pce
#1432.060	– $\varnothing 6 \times 14\text{mm}$	CHF 23.00
#1432.040	– $\varnothing 4 \times 10\text{mm}$	CHF 22.00

# ULTRA BURS TO DRILL STONES

## AGILO-ULTRA diamond burs

can drill soft and hard stones thanks to their multiple and resistant diamond layers. Their round shape facilitates the removal of dust while drilling. Tested and recommended by swiss lapidarists and jewellers. Sold by packs of 5 or in a kit.

## Drill holes from 9 to 14mm depth

Depending on their size, the burs can drill different hole depths, maximum 9 or 14mm depths. The chart below shows the maximum depths that can be drilled.

**HP Adaptor** The shank is  $\varnothing 1.6\text{mm}$ . Add the HP adaptor ( $\varnothing 2.34\text{mm}-3/32''$ ) to mount these burs on a micromotor or a handpiece.

**Tolerances** Because of the multiple diamond layers, the diameter of the head can be larger than indicated: up to  $+0.06\text{mm}$  diameter.

#2350.KIT  
Kit of 6 burs  $\varnothing 1.0-2.1\text{mm}$   
With HP adaptor

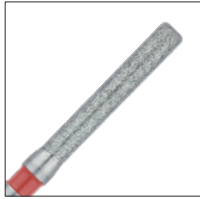

## Recommendations for drilling to preserve your stone and the tool

Avoid over-heating and breaking of the stone and the tool. Work with both the stone and the tool in water or humidify them on a regular basis. Keep a very stable position and drill with a  $90^\circ$  angle between the drill and the surface of the stone. Drill at low speeds (max 5.000 tom) and use mild to medium pressure. How to proceed: drill for sequences of maximum 10 seconds with mild to medium pressure, humidify the stone and the tool, then drill again.

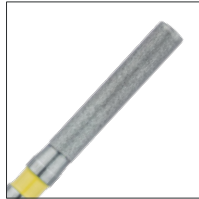

Art. Nr.	Head $\varnothing$ (tolerance $+0.06\text{mm}$ )	Maximum drilling depth	Sold by box of 5 pieces CHF/Pce

# AGILO SHARP TO SHARPEN YOUR TOOLS

AGILO SHARP is a line of diamond abrasive wheels to shape and sharpen your tools, gravers, drills, made of steel, HSS and carbide. Developed with swiss professional stone setters and engravers.

## Goals

- To sharpen faster
- For precise angles
- For scalpel-like blades
- For a perfect mirror-polish

## Including

#5010 SHARP Stone, Step 1 to grind the tool  
#5021.M SHARP-M, Step 2 to polish  
#5031.XF SHARP-XF, Step 3 for final/mirror-polish

## Tips

Recommended speed 5,000-7,000 rpm  
Wear mask and eye protection

Art. Nr.	Description	CHF Kit
#5001.SET3	The complete kit with #5010, #5021.M and #5031.XF	CHF 92.80

## #5010 SHARP Sintered stone Step 1: to grind and shape your tools, make angles and blades

Diamond sintered wheel, rigid like a stone, very efficient with a fine grit. To grind and shape your tools, gravers, drills, made of steel, HSS and carbide. Can also be used to grind fine stones and cabochons.

The diamond grit is very efficient but fine, minimizing the subsequent polishing work on metals and stones.

Recommended speed 3,000-7,000 rpm.  
Wear a mask and protective glasses when working with stones and metals.

Art. Nr.	Description	CHF Pce
#5010	SHARP Sintered stone Ø22x3mm	CHF 25.00

# AGILO SHARP TO SHARPEN YOUR TOOLS

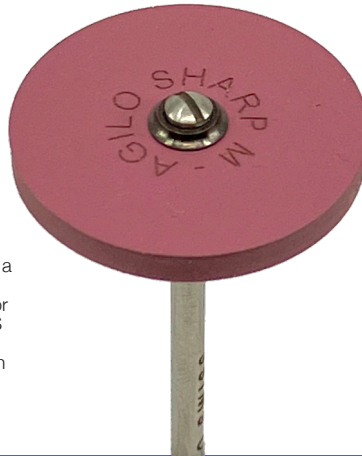

## #5021 SHARP-M

### Step 2 :

#### To polish the surface Medium grit

Diamond abrasive wheel with a medium grit to start polishing the surface of hard metals. For your tools made of steel, HSS and carbide. The wheel has a stainless steel ring underneath to create maximum rigidity. It will help you make perfect angles.

With a stainless steel disc in the back for maximum rigidity

Art. Nr.	Description	CHF Pce
#5021.M	– SHARP-M Square edge diamond wheel Ø22mm Medium grit	CHF 33.90

## #5021 SHARP-XF

### Step 3 :

#### Final/mirror polish Extra-Fine grit

Diamond abrasive wheel with an extra-fine grit for the final/mirror polish of hard metals. For your tools made of steel, HSS and carbide. The wheel has a stainless steel ring underneath to create maximum rigidity. It will help you make perfect angles.

With a stainless steel disc in the back for maximum rigidity

Art. Nr.	Description	CHF Pce
#5031.XF	– SHARP-XF Square edge diamond wheel Ø22mm Extra-Fine grit	CHF 33.90

# CABSHINE TO MAKE YOUR CABOCHONS SHINE

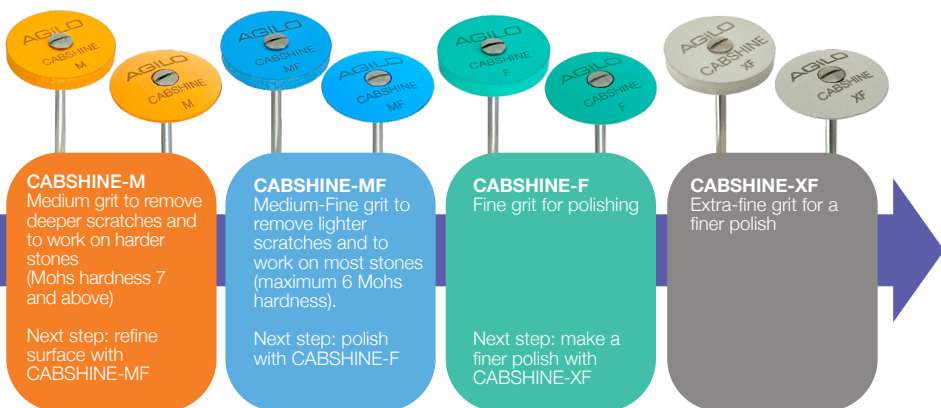

CABSHINE diamond rubber wheels to polish your cabochons and fine stones. They work on soft and hard stones: Coral, Lapis, Turquoise, Amethyst, Aquamarine, Ruby, Turmaline, Crystals, Quartz, Topaze, etc. Tested and recommended by swiss professionals.

## Pour whom and for what

- With CABSHINE jewelers and stone setters can polish stones themselves
- To remove abrasions and scratches even when stones are set
- To fix stones (cabochons or faceted) before setting, to fix the edges when they are rough, broken or too thin and prone to breaking.

## Tips

- Recommended speed 2,000-7,000 rpm
- Always polish crosswise: in one direction (for example, left to right) and then in the other direction (top and down)
- Water is not needed on most stones, but on specific ones like Coral, Opal, Amber, etc., use water and very low speed to minimize heat
- Edges of the square edge wheels are sharp, grind/round them slightly to avoid marking stones
- Be careful with faceted stones: diamond wheels will round the facets
- Practice first with cheaper stones
- Wear a mask and eye protection

## CABSHINE Starter kit of 3

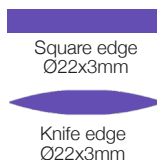

With three knife edge wheels CABSHINE-MF-F and XF to polish most stones

Art. Nr.	Description	CHF
#5100.SET3KN	Starter kit with 3 knife edge wheels Ø22x3mm CABSHINE-MF-F-XF	CHF 98.70

## Square or Knife edge

Square edge wheels can be used on large surfaces. Knife edge wheels are more flexible and can reach tight areas, for example when stones are set on a ring.

# CABSHINE TO MAKE YOUR CABOCHONS SHINE

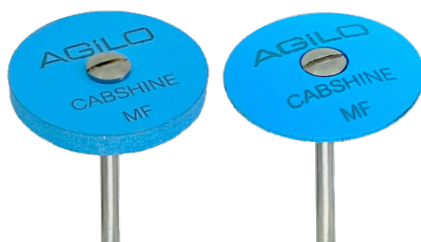

## CABSHINE-M

Medium grit to remove deeper scratches and to work on harder stones (Mohs hardness 7 and above)

Next step: refine surface with CABSHINE-MF

Art. Nr.	Description	CHF Pce
#5111.M – CABSHINE-M	Square edge Ø22x3mm	CHF 32.90
#5112.M – CABSHINE-M	Knife edge Ø22x3mm	CHF 32.90

## CABSHINE-MF

Medium-Fine grit to remove lighter scratches and to work on most stones (maximum 6 Mohs hardness).

Next step: polish with CABSHINE-F

Art. Nr.	Description	CHF Pce
#5101.MF – CABSHINE-MF	Square edge Ø22x3mm	CHF 32.90
#5102.MF – CABSHINE-MF	Knife edge Ø22x3mm	CHF 32.90

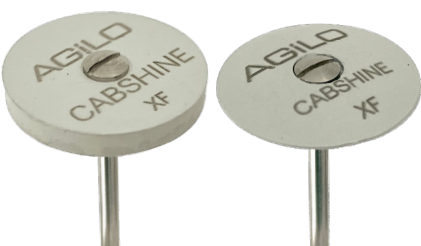

## CABSHINE-F

Fine grit for polishing

Next step: make a finer polish with CABSHINE-XF

Art. Nr.	Description	CHF Pce
#5121.F – CABSHINE-F	Square edge Ø22x3mm	CHF 32.90
#5122.F – CABSHINE-F	Knife edge Ø22x3mm	CHF 32.90

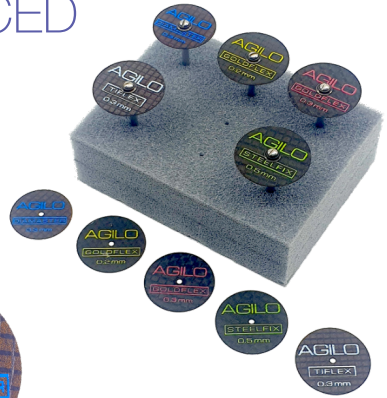

## CABSHINE-XF

Extra-fine grit for a finer polish

Art. Nr.	Description	CHF Pce
#5131.XF – CABSHINE-XF	Square edge Ø22x3mm	CHF 32.90
#5132.XF – CABSHINE-XF	Knife edge Ø22x3mm	CHF 32.90

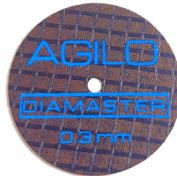

# CARBONE REINFORCED DISCS

Max speed 25,000 rpm.  
Tested and recommended by swiss professionals.

## DIAMASTER BLUE #2803

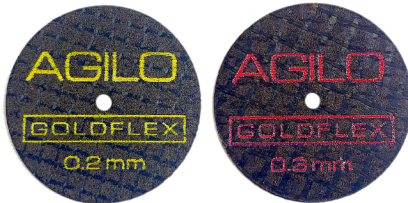

A powerful, flexible and thin cut-off disc. Reinforced, with diamond carbon throughout. It is the most powerful carbon disc on the market. For everyday tasks. Use it like a sawblade to cut precious metals. Cut and shape gravers made of HSS or carbide.

Art. Nr.	Pack of 3
#2803 – Ø22x0.30mm DIAMASTER DISC	CHF 10.90

## GOLDFLEX

Reinforced, extra-thin and flexible, for precious metals

Art. Nr.	Pack of 10
#2812 – Yellow Ø22x0.2mm	CHF 16.90
#2813 – Red Ø22x0.3mm	CHF 14.40

## HP Mandrel for cutting discs

This mandrel has a Ø5mm head and plastic protections to minimize the breaking of flexible discs.

Art. Nr.	Pack of 10
#4905 – Ø5mm	CHF 6.00

## STEELFIX

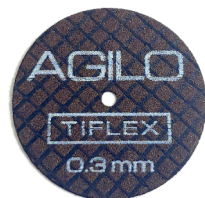

Reinforced and rigid for precious metals and steel  
Ø22x0.50mm

Art. Nr.	Pack of 10
#2825 – Ø22x0.50mm	CHF 14.40

## TIFLEX

Reinforced, extra-thin and flexible, for titanium  
Ø22x0.30mm

Art. Nr.	Pack of 10
#2833 – Ø22x0.30mm	CHF 16.90

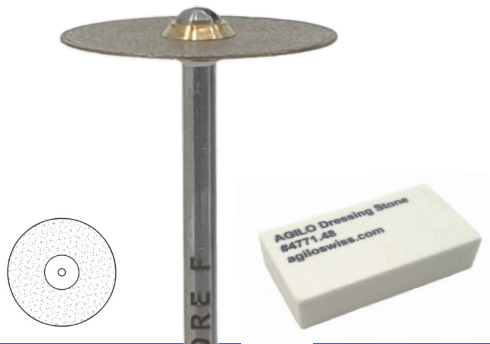

# DIACORE DIAMOND SINTERED DISC

## DIACORE-F Diamond sintered disc - precise and versatile - for stones and metal

AGILO DIACORE-F disc is a precise, ultra-thin (0.3mm thickness) and long lasting disc. Use it for details cutting and carving of soft and hard stones such as Topaze, Amazonite, Quartz, Tourmaline, Agate, etc. Use it also to cut and sharpen tools made of steel, hss and carbide. Recommended speed : 5,000-10,000rpm.

#4771.48 – DIACORE Dressing stone  
Use the AGILO DIACORE dressing stone to clean, regenerate the disc, and use it for very long periods of time. Only for sintered discs. Size 48x25x12mm.

Art. Nr.	Description	CHF
#2202.190	– DIACORE-F Fine grit Ø19x0.3mm	CHF 27.00 / pce
#4771.48	– Dressing stone 48x25x12mm,	CHF 6.00 / pce
#2205	– DIACORE Long life kit: disc and stone	CHF 33.00 / kit

## DISCS FOR ZIRKON

Diamond disc for separating of ceramic restoration and zirconium oxide. Diamond rims on both sides of the disc. Thickness 0.15mm.

Art. Nr.	Description	CHF
#2215.10	– Ø10x0.15mm – Fine grit	CHF 15.00
#2215.14	– Ø14x0.15mm – Fine grit	CHF 14.00

# YOUR VERY OWN TOOLBOX

Jewelers, stone setters, watchmakers, communicate your skills and know-how with your own toolbox. Schools and teachers, give your students a complete box with the tools they need. We take care of the whole project, according to your needs: 3D project, prototype, production and packaging of the tools. We like to work with wood of our region. The minimum quantity to start the project is around 50 pieces. Example: a toolbox we have created for a renowned swiss watchmaker.
